The MetroWest Community Health Care Foundation is pleased to offer a series of workshops for local organizations working to improve community health.

The Logic of the Logic Model: Making Sense of Inputs, Outputs and Outcomes

Date/Time: Thursday, September 25, 2008, 8:30am to 3:30pm
Registration and coffee/bagels will begin at 8:00am

Location: Crowne Plaza Hotel, 1360 Worcester Street (Rt. 9),
Natick

Speaker: Karen Horsch, Evaluation Consultant

Description: Back by popular demand, this workshop will use a combination of didactic instruction and hands-on work on grantees' own logic models. Participants will come away with an increased understanding of the logic model methodology and how it can be used for reporting, project improvement and agency management. Attendees are encouraged to bring a sample logic model with them. Lunch will be provided.

About the Speaker:

Karen Horsch has over fourteen years of nonprofit evaluation experience, including three years as project manager with the Harvard Family Research Project where she conducted a major Pew-funded research study on outcomes-based management in the nonprofit sector. Her client list includes Lutheran Social Services, Endowment for Health, Legal Services Corporation, New York Women's Foundation and the New Hampshire Minority Health Coalition.

Registration Information:

Up to two people per organization may attend. Registration is limited and is on a first-come, first-served basis. It is strongly recommended that attendees bring a sample logic model with them to the workshop.
